LEADING THE WAY

I am pleased to introduce you to the MAC Trailer product line. Over 30 years ago, I started in business as a one-man operation repairing wrecked trailers in a single bay garage. Since then, MAC Trailer has grown to be the nation's foremost manufacturer of dump, flatbed, drop-deck, transfer, dry bulk pneumatic tank, and liquid tank trailers. MAC Trailer now encompasses nearly 2 million square feet of facilities on campuses over 600 acres, and we are able to service both national and international markets.

The success of MAC Trailer can be attributed to a quality product built by quality people. Our product lines are complemented with an experienced sales staff, an extensive dealer network, and a full service and repair facility. In addition, a complete aftermarket parts department provides our customers an added level of support.

As a manufacturer, we recognize the ever-changing market and the necessity to maintain a competitive edge. Our innovative trailer designs will increase payloads, maximize performance, and enhance profitability. MAC Trailer is committed to continued improvement in our design to meet the demands of our customers, and we are pleased that you have joined us on our journey to do so.

SHEET & POST DUMP

ALUMINUM DUMP TRAILERS

Side Wall Construction

Side Wall Sheet – .175 thickness, 5454 H34 aluminum – for the more aggressive applications a .250 aluminum side is optional.

Top Rail – 6061 T6 extruded aluminum rail with a 7” face. The design incorporates a channel to hold the top side of the wall sheet which, is welded in place. Protective top rail boards, angles or house tops are available.

Uprights – 8” wide with 4” face - 5454 H32 aluminum plate - approximate 30” spacing – subject to the application, uprights can have closed spacing for added side wall strength.

Bottom Rail – a hollow designed extruded 6061 T6 aluminum bottom rail houses the lights and wiring for protection from the weather and road elements.

Side Lights – 3 LED lights per side.

OPTIONAL FEATURES

Slope Nose

Man Door

Ladders and Steps

MVP DUMP

MAC VERTICAL PANELS

The side wall panels are 15.5" wide by 1.5" deep, 5 void extruded aluminum hollow core panels that are fully welded top to bottom on the interior wall of the trailer to help prevent material lodging into the joint and to provide added side wall strength. The fully polished, weldless exterior offers a mirror finish for company branding and ease of cleaning. For severe and heavy haul applications, 15.5" wide by 2.25" deep panels are also available. A hollow designed extruded 6061 T6 aluminum bottom rail houses the lights and wiring for protection from the weather and road elements.

MACSIMIZER DUMP

ALUMINUM HALF ROUND DUMP TRAILERS

The MACsimizer Half Round has proven to be a lightweight, durable trailer for everyday use. The advanced design makes this trailer ideal for those who need to maximize their weight capacity while maintaining dependability.

Sidewall – .190" or .250"

Side Heights – 56" – 60" – 64" – 68"

Liners – 60" – 69" – 120" or full width liners

Radius Bulkhead – Low profile front end with a lower center of gravity providing a 7" lower front end and a 6" lower back end with 31" less flat space on the bulkhead compared to a standard flat bulkhead.

Better operational profit leads to increased fuel mileage – Smooth side walls create less drag resistance. Better fuel economy = Better Operational Profit

Weight – As low as 8900 lbs., less liner and tarp. Depending on options applied.

Stability – Loads stay centered in the belly while dumping due to the round design.

Six Piece Design – Each side wall section overlaps the floor panel for maximum strength.

Replaceable Coal Door

Front Doghouse Cap-offs

Multiple Axle Configurations

Remote Greaser

STEEL DUMP

The MAC steel dump trailers encompass a rugged design and construction to meet severe hauling requirements. With several models offered, durability and longevity are maximized.

Improved aerodynamics with our new radius style bulkhead = Increased fuel savings. Now standard on all MAC steel dumps.

Also offering a 102" wide option for a 100 cubic yard maximum capacity.

Available in the MAC Steel Lite package with the following aluminum options: sub-frame, frame, draft arms, tailgate, dollies, fenders, and wheels = Over 1,000 lbs in weight savings.

All MAC steel dump trailers are built with 3/16" or 1/4" AR450 material.

Body styles – the half round design for the greatest impact resistance and the 22" radius body with a flat floor to maximize cubic yardage capacity.

Available in frame type or frameless.

The air assist high lift gate option is also available. The cylinders and lift assembly are enclosed in the rear pockets for protection against loading and external exposure.
