

DUMP TRAILERS

IT'S THE DETAILS THAT MATTER

Sheet & Post Dump

Side Wall Sheet – .175 thickness, and .250 for aggressive applications

Top Rail – Extruded aluminum rail with a 7" face. Extruded radius, heavy duty house tops

Uprights – 8" wide tapered aluminum plate. Standard 30" spacing (approx.)

Bottom Rail – Boxed in extruded hollow aluminum bottom rail protects lights and wiring from weather & road elements

Design – Long established construction with increased weight savings

Smooth Side Dump

Panels – Inset or outset vertical side panels

Side Wall Sheet – Standard 1.5" deep sidewall, 2.25" for aggressive and heavy hauls, 5 void extruded aluminum hollow core panels

Structure – Fully welded interior seam

Exterior – Polished exterior for custom decal application and ease of cleaning

Steel Dump

Type – Frame type or frameless available

Body Styles – 22 degree radius tub

Material – 3/16" or 1/4" AR450 steel

Gate Option – Air assist high lift gate option
